

Changes to the Individual C.Diff Order Item in SCM

Beginning May 10, 2017, C.Diff testing algorithm criteria must be completed on the C.Diff order form when manually entering the order. C.Diff tests have also been removed from all order sets.

These changes has been approved by the C.Diff Task Force and Infection Prevention as an organizational priority to promote awareness of the automated testing criteria and document indications outside the algorithm.

Order:	Clostridium difficile PCR with reflex to Toxin	Order ID:	001BBH119
