

# Printing the Home Medication Summary List

May 24, 2017

When accessing Outpatient Medication Review (OMR) in SCM to create/print a patient's medication list at discharge, please use the "Cancel" button not the "Save Incomplete" button.

Using the "Save Incomplete" button will undo the physician's completed medication review and will result in the Discharge Note displaying an incomplete medication review status.

## Discharge Medications:

- The category for the medication below is based on an incomplete review of medication on Discharge:  
Continue taking the following medication(s):
