Carotid Endarterectomy (CEA) DNV Documentation Requirements

- Post CEA Neuro Checks and Stroke Education are DNV requirements
  - Stroke Survey-2021
Required DOCUMENTATION: Neuro Checks post CEA

Document in the Flowsheet: Adult PCS
- Q 15 min x 4
- Q 30 min x 4
- Q 1 hour x 2
- Include:
  - LOC, Pupils, GCS, Motor, Grips & Pushes/Pulls
Required DOCUMENTATION: CEA Plan of Care

OPEN Carotid Endarterectomy Plan of Care
Required DOCUMENTATION: CEA Education

- ADD CEA Education in the Education Tab
- This includes Education about Stroke Warning Signs under When to Seek Medical Attention
Required DOCUMENTATION: DISCHARGE: AVS

- Add the “Discharge Instructions for Carotid Endarterectomy” to the AVS through the Discharge Checklist
- When to call 911 → F.A.S.T. is a DNV requirement

Discharge Instructions for Carotid Endarterectomy

**When to call 911**

A stroke is a medical emergency. Call 911 right away if you have any of these symptoms of a stroke:

- Weakness, tingling, or loss of feeling on one side of your face or body
- Sudden double vision or trouble seeing in one or both eyes
- Sudden trouble talking or slurred speech
- Sudden, severe headache

F.A.S.T. is an easy way to remember the signs of a stroke. When you see these signs, call 911 fast.

F.A.S.T. stands for:

- **F** for face drooping. One side of the face is drooping or numb. When the person smiles, the smile is uneven.
- **A** for arm weakness. One arm is weak or numb. When the person lifts both arms at the same time, one arm may drift downward.
- **S** for speech difficulty. You may notice slurred speech or trouble speaking. The person can’t repeat a simple sentence correctly when asked.
- **T** is for time to call 911. If someone shows any of these symptoms, even if they go away, call 911 right away. Make note of the time the symptoms first appeared.
